Experience

Trillium Flow Technologies

1 Year 8 Months

Application Engineer

Aug' 23 - Mar' 25

- Consulted global oil & gas and nuclear power majors for effective pressure management and flow control, leading to **reduced downtime**
- Identified and focused on key customer pain points and tailored solutions leading to **improvement in their process efficiency by 10%**
- Achieved a **25% growth in order bookings** from key accounts by cultivating good customer relationships and value driven customer engagement
- Led cross functional teams to synchronize the product lead-time to customer's shutdown schedules, thereby becoming a reliable partner
- Collaborated closely with the Business Unit Head on sales strategies and implemented them, leading to differentiated techno commercial bids
- **Led the application engineering team**, managing the pre-order cycle for high-value proposals and secured orders worth **multi-million US dollars**
- Drove comprehensive process improvement efforts and streamlining of workflows resulting in an **increase of 25% of quotes submitted on-time**
- Created standard operating procedures for the function thereby enhancing proposal consistency, leading to **reduction of reworks by 20%**
- Designed and executed training programs leading to strengthening of team capabilities and prepared the team for future challenges

Severn Glocon Valves

5 Years 4 months

Senior Application Engineer

Mar' 18 - Aug' 23

- Devised costing strategy that balanced price competitiveness with profitability targets, significantly enhancing order winnability and profitability
- Managed the quote to cash cycle for multiple high impact projects amounting to an annual order booking of **multi-million US dollars**
- Headed cross functional teams and executed complex projects worth **multi-million US dollars** per year within contractual delivery time
- Identified high potential growth opportunities and unserved markets by conducting a rigorous in-depth competitor analysis
- Converted a sales account into a key account by identifying client pain points and solving them resulting in **a sales growth by 300%**
- Worked closely with the managing director on order winning strategy, positioning and execution of high value project contracts
- Managed the **end-to-end sourcing** activities including RFQ release, proposal evaluation, negotiation, award, expedition and payment
- Implemented competitive bidding processes that achieved a **cost reduction of 25%** resulting in an **annual savings of US\$ 125,000**
- Led supplier management initiatives through strategically optimized vendor relationships reducing lead times and boosting profitability
- Drove successful renegotiation of commercial terms and conditions with suppliers leading to strategic collaboration
- Ensured process compliance of multiple functions to the industry standards like API Q1 and ISO 9001 through internal audits
