Experience

P S Intelegentia

1 Year 7 Months

Sr Devops Engineer

Sep' 23 - Mar' 25

- Led cloud infrastructure and DevOps initiatives across AWS and Azure, managing migration of 7+ applications, increasing **system uptime** from 85% to 95%Enhanced system resilience.
- Reduced cloud infrastructure costs by 20% by Optimizing cloud infrastructure by right-sizing servers, without compromising application stability and user experience
- **Mentored and guided cross-functional teams** in DevOps best practices, achieving 100% CI/CD pipeline adoption across all development teams.

Baker Hughes

1 Year 4 Months

Build & Release Engineer

May' 22 - Sep' 23

- Led automation initiatives that eliminated 40–50% of repetitive manual tasks, resulting in significant cost savings and **improved developer productivity**.
- Collaborated with cross-functional stakeholders (Product, QA, Development) to ensure technical execution was aligned with strategic business goals, boosting system reliability and reducing outages.
- Collaborated with cross-functional stakeholders (QA, Development, DB) to ensure technical execution was aligned with strategic business goals, boosting system reliability and reducing outages

P S Intelegentia

1 Year 2 Months

Infrastructure/Devops Engineer

Feb' 21 - Apr' 22

- Integrated Azure Boards with agile sprints, enabling product managers and stakeholders to track delivery KPIs and make faster data-driven prioritization decisions.
- Used Azure Cost Management and Budgets to monitor resource consumption trends, supporting finance and product teams in quarterly cloud budget forecasting

Scriptuit Technologies

11 Months

Associate Cloud Engineer

Mar' 20 - Jan' 21

- Implemented Infrastructure-as-Code (IaC) using Terraform, enabling standardized, error-free deployments and supporting rapid scalability across multiple business units.
- Contributed to business continuity planning by enabling automated recovery mechanisms, achieving 99.9% service uptime during critical deployment cycles.

Indrayani Communication Systems

1 Year 5 Months

Linux System Administrator

Aug' 18 - Mar' 20

- Managed Linux-based servers and automated backup rotation, Implemented robust data backup policies with 100% recovery success
- Created detailed documentation of server configurations, backup procedures, and incident reports, ensuring knowledge transfer and audit readiness
