Experience

Tata Consultancy Services

4 Months
IT Analyst

Apr' 25 - Current

- Serving as the elected Placement Coordinator for the EPGP cohort at IIM Indore, representing a diverse group of 65+ experienced professionals in all placement-related activities.
- Engaging with CXOs, HR leaders, and alumni across industries to expand the institute's recruiter base and generate placement opportunities.
- Coordinating the end-to-end placement lifecycle, including company onboarding, job description circulation, shortlisting processes, interview scheduling, pre-placement talks, and final offer management.
- Managed cohort-wide sessions on resume building, interview preparation, and industry alignment, ensuring readiness and consistency across student for recruiters

Tata Consultancy Services

1 Year 4 Months
IT Analyst

Nov' 23 - Mar' 25

- Served a $1.1B UK based BFSI client by designing, developing and optimizing complex PL/SQL components and XSL Stylesheets supporting high-volume data processing systems used in regulatory and transactional communications.
- Achieved 45% code reusability for 500+ correspondences by parameterization across different line of businesses for the client.
- Adopted Agile practices using Confluence (documentation), PVCS (version control & release management), and JIRA Kanban (workflow management) to ensure traceability, streamline priorities, and accelerate delivery.
- Coordinated with cross-geographic teams across UK and India including business analysts, QA, and infrastructure to translate business requirements into scalable and maintainable technical solutions.
- Lead a team of 4 developers; delegated tasks, facilitated daily stand-ups, and ensured timely delivery of development milestones in alignment with Agile methodologies.
- Contributed to talent development initiatives by participating in the TCS Ninja campus recruitment process; conducted technical interviews and assessments for fresh graduate hiring.

Tata Consultancy Services

3 Years 10 Months
System Engineer

Dec' 19 - Oct' 23

- Engineered 250+ IVR flows and 2000+ audio prompts for a $50B U.S. based BFSI client using Cisco UCCE, achieving 100% regulatory compliance and boosting customer handling efficiency across all segments.
- Achieved a 95% reduction in IVR call flow testing time post DR activities and new deployments by automating it with Empirix Hammer Testing, delivering an annual savings of up to $120K and earning recognition from both the client and TCS.
- Worked collaboratively with infrastructure, QA and L2 support teams for code deployments, configuration changes, and validation in staging and production environments.
- Built real time monitoring dashboards using Splunk and Kibana to track application performance, enabling data driven insights that improved issue resolution speed by 30% and enhanced business decision-making.
- Documented Technical specifications, call flow logic, deployment plans into Knowledge Base Articles to support team efficiently in future.

Tata Consultancy Services

1 Year
Assistant System Engineer

Dec' 18 - Dec' 19

- Handled incident management and change requests as per ITIL standards; ensured minimal service disruption through effective root cause analysis, impact assessment, and stakeholder communication.
- Proactively created Knowledge Base (KB) articles and Postmortem reports to support continuous improvement, reduce repeated issues, and enhance system reliability for future deployments.
