2025 - 2026

AKTU

B.Tech- Mechanical

2014-2018

Certification

Lean Six Sigma Green Belt (KPMG)

This certificate equips professionals with a robust, data-driven methodology for process improvement. Focusing on the DMAIC framework, it enables candidates to identify and eliminate waste, reduce defects, and optimize operational efficiency within an organization.

2025

Certified Scrum Product Owner (CSPO) (StarAgile)

This certificate equips professionals with the essential skills and agile principles for product ownership and value maximization. Focusing on the Scrum framework, it enables candidates to effectively define product vision, manage the product backlog, and collaborate with development teams to deliver high-impact solutions that meet customer needs and business objectives.

2025

Supply Chain Logistics (Rutgers-State University)

This certificate provides professionals with a foundational yet comprehensive understanding of global logistics and supply chain optimization. It focuses on critical areas such as transportation, warehousing, inventory management, and logistics network design.

2025

Accomplishment

Project Management

Successful commissioning of a 1500 MT steel machining plant, ensuring operational readiness within an accelerated 8-month timeline.

Product Portfolio Expansion

Development and commercialization of cold-drawn stainless-steel bars in high-performance martensitic and duplex grades.
